Professional Profile

Full Stack Software Developer with over 10 years of experience in analysis, design, and development of enterprise applications. Proficient in .NET and JavaScript/Node.js environments, participating in projects involving modernization, migration to microservices, and API development for both national and international companies. I am a proactive professional with strong adaptability, teamwork, and a continuous learning mindset.

Professional Experience

08/2024 – 05/2026 | SHIFTA – Software Engineer

Modernization and migration of APIs for a major insurance company. Backend development using Nest.js (Node.js) and .NET 8, building a BFF and new microservices.

03/2024 – 06/2024 | Mobile Computing – Backend Developer

Development of Web API services (.NET 8) and implementation of a payment and money transfer gateway for a large retail chain.

11/2022 – 03/2024 | Sofre Digital – Backend Developer

Migration from a monolithic application to a microservices architecture using .NET 5 and Oracle. Maintenance of internal systems in .NET Core 2.1 and SQL Server.

11/2021 – 10/2022 | Tecnosoftware – Full Stack Developer

Migration of legacy systems (VB, C++) to .NET 6/Blazor. Development of new features for a U.S. fuel dispenser company.

04/2020 – 11/2021 | DXC Technology – .NET Developer / Support Analyst

Development and deployment of internal applications using Azure Services. Support and maintenance of critical systems for a U.S.-based company.

Education
