

MARTÍN ALEJANDRO PONCE

Senior Backend Developer (.NET | Node.js | NestJS)

Buenos Aires, Argentina | +54 11 6503-5037 | martinp88@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

Professional Summary

Software Engineer with 10 years of experience designing and building enterprise applications using **.NET** and **Node.js (NestJS)**. Specialized in microservices architecture, scalable REST API development, and legacy system modernization across critical industries such as insurance, fintech, and energy. Proven track record in cloud solutions integration with Azure and database management (relational and non-relational) within Agile environments.

Professional Experience

SHIFTA — Software Engineer 08/2024 – 05/2026

- Led the design and development of Backend-For-Frontend (BFF) architectures and microservices using **NestJS** and **.NET 8** for the insurance industry.
- Implemented **Clean Architecture** patterns to modernize and migrate legacy APIs into high-availability environments.
- Designed and integrated mission-critical REST APIs consumed by internal applications and external business partners.

Mobile Computing — Backend Developer 03/2024 – 06/2024

- Engineered REST APIs in **.NET 8** focused on core fintech features, including user authentication, money transfers, and payment processing.
- Collaborated on initial backend architecture design, ensuring high performance, scalability, and security standards.

Sofre Digital — Backend Developer 11/2022 – 03/2024

- Migrated enterprise applications from .NET Framework to microservices architecture utilizing **.NET 5** and **Oracle**.
- Designed backend services for key modules including billing, client queries, and service/promotion management.
- Built an automated batch processing engine for monthly Excel file imports handling 10,000+ records.
- Maintained and evolved internal HR platforms built on .NET Core 2.1 and SQL Server.

Tecnosoftware — Full Stack Developer 11/2021 – 10/2022

- Modernized enterprise applications for a US-based energy company, migrating legacy solutions in Visual Basic and C++ to **.NET 6** and **Blazor**.
- Developed and integrated new core features while ensuring 100% operational continuity throughout the migration.

DXC Technology — .NET Developer / Support Analyst 04/2020 – 11/2021

- Developed and deployed internal software solutions leveraging **Azure Cloud Services**.
- Provided advanced technical support for mission-critical systems serving global corporate clients.

Technical Skills

Backend & APIs:	C#, .NET (5/6/8), ASP.NET Core, Web API, Entity Framework Core, SignalR, Node.js, NestJS, REST APIs, OAuth2/JWT, WebSockets.
Frontend & UI:	Vue.js, Blazor, JavaScript, TypeScript, React, Angular.
Databases:	SQL Server, Oracle, MongoDB, MySQL, DB2, Firebase.
Cloud & DevOps:	Azure, GitHub Actions, Git, IIS, CI/CD pipelines.
Architecture:	Microservices, Clean Architecture, Layered Architecture, System Integration.

Education & Languages

Associate Degree in Software Development — I.S.T.E.A. (2018)

Languages: English (Advanced C1 - Fluent oral & written) | Spanish (Native)
